

***iBank Travel Management** is a web-based management reporting service designed to address the needs of the travel agency or corporation seeking to better manage travel expenditures and increase productivity. iBank Travel Management is easy to set up and can be installed on any GDS workstation, 3rd party quality control system computer, or back-office accounting system. iBank uses the workstation as its source for gathering travel bookings and then sends this information, via the Internet, to the secure iBank server. Once the data is received by the iBank server, the information is loaded into your database and is immediately available for up to the minute reporting from the World Wide Web twenty-four hours a day, seven days a week around the world.*

Pre-Travel

Captures travel reservation information from the four leading GDSs allowing access to pre-travel management reporting up to 365 days in advance of actual travel. With Pre-Travel, iBank clients have access to over fifty pre-designed management reports along with a very powerful yet easy to use custom reporting tool.

Benefits

- Saves money by eliminating the need to produce paper management reports.
- Provides up-to-the-minute snapshot of travel expenditures.
- Saves time tracking e-tickets, refunds, and service fee billing.
- Monitor corporate travel policy and exceptions or fare savings opportunities.

Post-Travel

Captures travel reservation information directly from 3rd party or GDS back-office accounting systems. With Post-Travel, clients have access to over fifty pre-designed management reports along with a very powerful yet easy to use custom reporting tool.

Benefits

- Saves money by eliminating the need to produce paper management reports.
- Proactive approach to travel management by providing up-to-the-minute snapshot of travel expenditures as far back in history as you want to maintain.
- More effective means to monitor corporate travel policy and any exceptions or fare savings opportunities.

Data Cleanser

Electronically audits and cleanses data captured through the GDS or agency back-office accounting systems. With over fifty pre-set data audits and rules as well as the ability to easily design customer specific audits, iBank Data cleansing is the most effective means to ensure quick and accurate corrections to the travel management information that you provide to your clients.

Benefits

- Allows quick and easy identification and correction of data.
- Provides the flexibility to use pre-defined audits or customized rules to ensure data integrity.
- Sets high or low thresholds when auditing fares and rates.
- Available for both pre and post travel data cleansing.

Broadcast Report Scheduler

This module allows you to deliver standard and/or custom reports and graphics to your clients on a specified date and time. iBank will automatically run the reports for you and your client and store the reports until the client retrieves them. Once the reports are completed, iBank sends an automated e-mail to your clients or you with all of the HTML links to their reports.

Benefits

- Eliminates process of producing and delivering paper reports.
- Eliminates cost of printing management reports.
- Provides immediate access to timely reporting at your client's desktop.

Additional Functionality

TicketTracker

With the introduction of TicketTracker for the iBank Travel Management reporting system, agencies and their clients now have an electronic means for tracking and identifying unused portions of a traveler's ticket for credit towards future flights. By electronically monitoring the reservation system for unused e-tickets, TicketTracker will save your agent and accounting personnel valuable time and money.

Benefits

- Reports on status of unused coupons, and enters this information into the traveler's profile.
- Saves money from making use of unused tickets.
- Allows travel agent instant access to unused coupon credits.
- Notifies traveler of unused coupon availability via email.

With the deluge of information being sent electronically, your ability to create direct channels of communication between you and your customer is more important than ever before. Even more critical is the communication of time sensitive and critical contact information such as travel itineraries. You don't have the luxury of trusting that the recipient will read your important information or that it will be recorded in the right destination. If there's a break in the communication, you're responsible. This is why Cornerstone has selected the Infotriever calendar integration application to work with iBank. Infotriever automatically places your iBank itinerary into the traveler's electronic calendars.

Benefits

- Establishes one-to-one marketing relationship between you and your customers.
- Ensures that your customers always have the right information where and when they need it.
- Enables you to deliver branded messages and product or service promos directly into your customer's calendar.

No other product on the market enables you to deliver exceptional customer service and personalized direct marketing communications at the same time.
